

Module 2: Requirements Engineering & IEEE 830 SRS

Functional Requirements, Elicitation FAST/JAD, DFDs & SRS

Module II: Requirements Engineering & IEEE 830 SRS — Topics Covered

1. Functional vs. Non-Functional Requirements
2. Requirements Elicitation (FAST, JAD, Interviews)
3. Data Flow Diagrams (DFD Level 0, 1, 2)
4. IEEE 830–1998 Standard SRS Structure
5. Requirements Traceability & Validation

1. IEEE Standard 830–1998 Structure of SRS

- **1. Introduction:** Purpose, Scope, Definitions, References, Overview.
- **2. Overall Description:** Product perspective, Functions, User classes, Operating environment, Design constraints, Assumptions.
- **3. Specific Requirements:** Functional requirements, Performance criteria, Security/Safety constraints, External interface specifications (UI, Hardware, Software, Communications).
